## All-Star Configuration File Information

***Config.vwe is an AES 128 bit encrypted file.***

**AES** - In cryptography, the Advanced Encryption Standard (AES), also known as Rijndael, is a block cipher adopted as an encryption standard by the U.S. government. It has been analyzed extensively and is now used widely worldwide as was the case with its predecessor, the Data Encryption Standard (DES). AES was announced by National Institute of Standards and Technology (NIST) as U.S. FIPS PUB 197 on November 26, 2001 after a 5-year standardization process. It became effective as a standard May 26, 2002. As of 2006, AES is one of the most popular algorithms used in symmetric key cryptography.

- The All-Star Identification Systems Encryption Algorithm is in a dll file
- The Key is hidden in code
- We have customers who have been using our system with this high level of security since 2002 (GE, Pfizer, Pratt & Whitney, etc.)
- Our Configuration Editor is password protected and can be remove from the client PC all together
